A DIGITAL WORKFLOW SOLUTION

Be aligned with the next industrial revolution with integrated solutions of software, equipment, and people to improve work efficiency and optimise processes.

A DIGITAL WORKFLOW SOLUTION FOR INSPECTION

TMR by Talcyon is an innovative end-to-end system aimed to optimise inspection processes, reducing overall worktime and increasing efficiency. Its integrated system comprises of **TMS,** a fast tube mapping software, defects tag generator, your handy inspection device and a user-friendly report building software.

Complete your inspection tasks in one seamless workflow. We eliminate the need to switch between multiple devices and softwares just to settle one job!
